Texas Historical Commission

To Whom it May Concern:

I highly recommend Debbi Lamb and Penguin Suits, Inc. for your Website Creation requirements. I have worked with Debi over the past 6 months in my quest to have a website approved by the City of Encinal, Texas. With no commitment on my part to Penguin Suits for future work, Debi assisted me in understanding the requirements for a website creation, the type documents required for the website, and the most economic approach to selecting a website that fit the City's needs. This was accomplished through numerous phone calls and emails to Debi, for which she was always available and would talk at length until I understood her answers to my questions.

I have recently been successful in obtaining approval from the City of Encinal for the website. This was done with the aide of exhibits that were prepared by Penguin Suits specifically for my presentation. I must add that the main selling point to the City was the strong belief that Penguin Suits would be there in the years to come to maintain and expand our site as our needs dictated.

In closing, I recommend the use of Penguin Suits for creating and maintaining a website for any person, company or organization that wants a personal touch to a professional need.

Sincerely,

John Lupear
